The Laboratory can't be researching to use Magic Hammers. Heroes are the only troops that are not upgraded through the Laboratory. After placing these two new storage structures, you can swap your defense to an appropriate Town Hall 9 base. Once you are sitting on a good TH9 base layout, you can then upgrade your storage structures to level 11 and add the new Hidden Tesla tower. Second Priority Tasks at Town Hall 9: Once builders finish their tasks above, they can start working through these second priority tasks in order. First, many upgrades and new structures available at Town Hall 9 are very expensive. As soon as the first X-Bow finishes, you should have been able to save enough gold to not only start the second X-Bow, but also upgrade the new walls to level 5 (which is good enough for now). Builder 3. New Walls -> New X-Bow #1 -> New X-Bow #2. The second builder should add the 25 new walls available at Town Hall 9 and then start constructing an X-Bow. If you do not farm aggressively, you likely are going to have builders resting at some point. If there is something small you can upgrade in between (such as one of the new towers), go ahead and stick it in here in order to keep your builders occupied. Builder 2. Getting this upgraded fairly early on in the Town Hall 9 lifecycle will pay dividends. If you are a dedicated player and play enough to attack several times in a row, you may be able to get the Clan Castle earlier. Upgrade Archer Towers, Cannons, and Hidden Tesla Towers. Odds are you will reach this step while some of your builders are still stuck on previous steps. Not only is Dark Elixir a very tight resource at Town Hall 9, but you should have some extra Elixir coming into Town Hall 9 (since the only other starting Elixir-based building is the Laboratory). This builder should then focus on upgrading the 4 existing Army Camps. Different from Magic Books, the Hammers have the ability to start (without using resources) and finish any upgrade, making them the most powerful Magic Items on the game. No other builders will be used for Army Camps (even though Army Camps are important) because you will need to save your Elixir for research at the Laboratory. As soon as you finish upgrading all of your Army Camps, have this builder jump to Task #7 on the priority list, regardless of how far you have proceeded on the previous tasks. Builder 4 & 5. Based on resource constraints, you may need to move out of order when upgrading or pause briefly while you gather additional resources. Builder 1. The fourth and fifth builders can then start to work on upgrading the Archer Towers, Cannons, and Hidden Tesla towers to their new maximum level. The order in which you upgrade these structures is not terribly important. If not, you can skip starting with the Archer Queen and just add it when you get the 40,000 Dark Elixir you need. With Builder #3, we are going to start building the Dark Elixir Drill. You do not want to sit around and max out all your walls or even try to upgrade your heroes to their maximum level. While previous upgrade orders tended to focus on improving offensive strength as a main objective and defensive strength as a secondary objective, this is no longer the case at Town Hall 9. The reason for this change is two-fold. You may want or even need to skip around based on the amount of resources you have and your builder timings. Note that if you ever have enough Dark Elixir to upgrade the Archer Queen or Barbarian King, you should make that your next upgrade. It can be built once you reach Town Hall 3. Content Using the Laboratory: Researching new levels to your army can be started with Elixir or Dark Elixir, depending on the item. Increasing the unit capacity of this structure also offers a nice offensive and defensive boost. While the Clan Castle is an important upgrade, it is also difficult to save 5,000,000 gold if you have a weak defense, so the upgrade priority for this building was placed a little lower than it otherwise might be on this task list. Instead, you should focus on the amount of time it takes to complete each upgrade. Nobody has dared to look Archer Queen -> Dark Elixir Drill -> Army Camp Upgrades -> Task #7. Ideally, you came into Town Hall 9 with enough Dark Elixir saved to buy an Archer Queen. Research, upgrading Heroes and Walls. Even after you finish all of your tower upgrades at Town Hall 9, it can be useful to hang out at TH9 for awhile before going up to Town Hall 10. This will give you access to both the Witch and Lava Hound. Join us and improve this article! What dark secrets do the Alchemists hide inside their Laboratory? Upgrade Wizard Towers One at a Time Much like the Mortar, upgrading the Wizard Tower results in a large increase in defensive capabilities, but upgrading more than one at a time leaves you susceptible to attacks. Assign One Builder to Upgrade Dark Elixir Drills, Dark Barracks, and Dark Elixir Storage Upon upgrading all of your Army Camps to level 7, the builder assigned to formerly assigned to upgrading the Army Camps should begin focusing on other Elixir-based upgrades. New Archer Tower -> New Air Defense Tower -> New Wizard Tower -> New Gold & Elixir Storage -> Switch Base Set-Up -> Upgrade Storage Structures -> New Hidden Tesla Some players will have 4 builders at TH9, some players will have 5 builders. With the introduction of the Lava Hound and popularity of Balloonion attacks at Town Hall 9, upgrading your Air Defense is a fairly high priority. Task 3. Laboratory -> Spell Factory The first builder should start upgrading the Laboratory as a top priority. Sitting on 20,000+ Dark Elixir at Town Hall 9 is a good way to get raided by a high-level army. Task 1. You should focus primarily on farming Dark Elixir so that you can upgrade your heroes and complete Dark Barracks research, while spare gold and Elixir can be used to upgrade walls. There is a limit to how long you should stay at Town Hall 9 however. There is no point sitting at TH9 with 5 builders idle and nothing to research while you gather resources for walls. It is good to permanently assign one builder to Elixir-based buildings in order to prevent Elixir from getting building up too high. Even if most of your walls are level 7 or 8, go for TH10. If you can save up the gold, go ahead and move this task to priority 3. Task 5. You can upgrade one tower at a time without significantly impairing your air defense. It depends how many achievements you worked on and how diligently you saved your gems up until this point. However, upgrading the Wizard Tower costs more gold than the Mortar, so it is easier to upgrade the Mortar first. Upgrade Wizard Towers one at a time. Whether you have 4 or 5 builders, it does not matter too much, as these builders will work through these upgrades in order, whether it is with one builder or two.Start by adding all three new towers (aside from the Hidden Tesla tower). This means several (early) Hero levels per month just from Dark Elixir Drill production.Once the Dark Elixir Drills are maxed, have this builder focus on upgrading the Dark Barracks. The most important upgrade to start as soon as this finishes is Barbarian level 6. A level 6 Dark Elixir drill produces 2,400 Dark Elixir a day; two of them will produce 4,800 a day! That is 33,600 Dark Elixir a week and nearly 150k Dark Elixir per month. It is better to move up where it will be easier to get Dark Elixir so that you can focus on something that will really improve your raiding strength (extra hero levels, new tiers of research, larger Army Camps, new tower levels, etc). This whole process should not take very long (less than a day). Upgrade Air Defense Towers One At A TimeAir Defense towers take a long time to upgrade and upgrading more than one at a time leaves you very vulnerable to attacks. If you are upgrading too many Wizard Towers, you will be susceptible to both Barbarian/Archer and Minion-based attacks.Task 6. Complete Early Tower UpgradesAs a first task after completing the high priority upgrades, work on getting your new Archer Tower, Air Defense tower, and Wizard Tower up to a respectable level. Instead, once you complete all the research available to you at TH9, it is time to move on to the next level. Upgrade Clan Castleby about this time in your progress through Town Hall 9, you likely will be able to take out tough enough opponents in Clan Wars that you will need to upgrade your Clan Castle by necessity in order to hold more loot. Hopefully you will have both of your heroes to level 20 by the time all of your research is finished. Even if they are both only level 15, that should be adequate. 11/12/201901/24/2022Share on TwitterShare on Facebook Clash of Clans - Home Village > Army Buildings > Laboratory This is an open guide created and improved by the Clash community. Upgrade X-Bows One at a TimeWhile the X-Bow itself does not do a massive amount of damage, its very long range and capacity to hit air and ground units means that in the average raid it will contribute more to your overall damage than any other single-target tower (Cannons, Archer Towers, and Hidden Teslas).X-Bows provide a solid amount of anti-air defense, so hopefully you will be finished upgrading your Air Defense towers (or at least have 2 Air Defense towers at level 7) by the time you reach this step. When you are dealing with upgrades that take 6-12 days to complete, it is important to try and stagger your builders so that a builder is available for dumping resources (either on walls or hero upgrades) every 2 days.For example, if you have 5 builders, and the first 3 builders have 2 days, 4 days, and 6 days left on their current assignments, the last thing you would want to do would be to upgrade the Archer Tower from level 10 to level 11.

Three multi-investigator groups that operate principally in the TB/HIV space: The South African TB Vaccine Initiative (SATVI), which includes Mark Hatherill (Director), Tom Scriba (Deputy Director) and Elisa Nemes; The Wellcome Centre for Infectious Diseases Research in Africa (CIDRI-Africa) which includes Robert Wilkinson (Director), Graeme Meintjes, Catherine Riou and Anna Coussens 03-07-2017 - 1.
